

VALUE ADVANTAGE[®] CABIN AIR FILTERS

Value Advantage Cabin Air Filters help create a better environment on the inside of the vehicle. Air quality inside the vehicle can be up to 10x worse than the outside air. Cabin air filters help clean the air inside your vehicle using a broad range of filtration technologies that help prevent the circulation of odors, bacteria, and germs. They also help prevent bugs, dirt, and leaves from harming the HVAC system.

- Precision engineered for long life to improve passenger air quality.
- Electrostatically charged media and multiple particulate layers help dust and pollen from entering the passenger compartment.
- Designed to OE specifications for easy installation.
- Maintains capacity and efficiency throughout the life cycle.
- Resistant to temperature extremes including high heat and humidity.

It is recommended that filters be replaced every year, or sooner, depending on conditions. Value Advantage Cabin Air Filters are a cost-effective solution available from your local Nissan Dealer.
